6th I.S.L.E Erasmus Networks Project meeting on the theme of “Innovation Practices”

I.S.L.E.

INNOVATION IN THE TEACHING
OF SUSTAINABLE DEVELOPMENT IN LIFE SCIENCES IN EUROPE

11-15 March 2013
Maribor, Slovenia

The I.S.L.E project aims to develop innovation regarding a transverse, crosscutting or even transdisciplinary issue. Data already exists, websites, programs can already provide information; however, a tool to mutualise, to develop and to transfer innovations in the introduction of the concept of sustainable development in the teaching of life sciences, does not yet exist.

The I.S.L.E Network is willing to propose something new and will focus on a theme that has not been investigated enough. "Everyone" talks about sustainable development, its demand is evident. In terms of education, it is certain that some researchers have worked on the subject, but it is not formatted and in any case, will require huge changes to work in an interdisciplinary way.

Overview of the 6th project meeting

It will be an opportunity for the consortium members to discuss on the progress and outcomes of the project so far, based on the previous **"Exploitation"** and **"Professionalization"** meetings, which provided significant feedback to the partners.

This meeting will enable the consortium partners to discuss about Innovation Practices and the way that these may be implemented in the project's context. Dr. Vesna Weingerl will be the host of the upcoming 6th I.S.L.E. meeting that will take place in the University of Maribor in Slovenia from 11-15th March 2013.
